Ticket prices plus booking fees (10%, max. 2.10 EUR)

Special information about superScale Camping

Please read carefully to the end!

This is an extra service we are offering you for the superScale weekend—we will install the necessary infrastructure, such as power supply, especially for this purpose.

Camping right next to FreeScale—exclusively for the superScale weekend.

- Camping directly at the FreeScale area – exclusively for the superScale weekend.
- **130 pitches**, each equipped with its own Schuko power outlet (1 kW).
- Electricity is included in the 10 € base fee per pitch and cannot be deselected.
- **Charging electric cars, e-scooters, or e-bikes is not permitted.**
- **Quiet hours begin at 10 p.m.** – this means that music may only be played on your own pitch and at a volume that does not disturb anyone else.

Please be considerate of one another!

Even during the day, music should only be played in your own area. Many people come here to relax and do not want to hear noise from other pitches all day long. A little consideration makes it more pleasant for everyone.

Thank you for your cooperation and respect!

- Pitches are suitable for caravans/cars or motorhomes; two cars + two tents also fit.
- Booking is only possible through superScale, **not** via the Mammutpark.

Additional information Ticket prices and camping 2026

- There is no guarantee when buying a superScale ticket that there will automatically be space on the camping area and that camping tickets can be booked separately - if full then full.

Camping tickets are limited to the number of pitches available to prevent overbooking of the camping area.

In the ticket shop, you can once again select your desired pitch directly via the seating plan and then enter the number of nights for all persons.

This will then give you the total price of the ticket for the pitch.

In the ticket shop, camping will always be shown on the tickets from May 21 (the first possible day of camping on the special area) onwards – this is for legal reasons.

Simply enter the number of nights per person for the pitch you have booked – that's it.

And then you arrive on Thursday, Friday, or even Saturday, for example – just ignore May 21.

In the following booking example, you can see which steps are necessary – so that everyone knows how to make a booking.

At this point, we would like to make an urgent appeal to everyone booking camping.

It is not a good idea—even if it is tempting:

please do not make “reservations” for pitches, based on the motto “the main thing is to secure pitches and then see how busy it gets, and I'll book overnight stays on site”—this would be unfair to everyone else who wants to book a pitch.

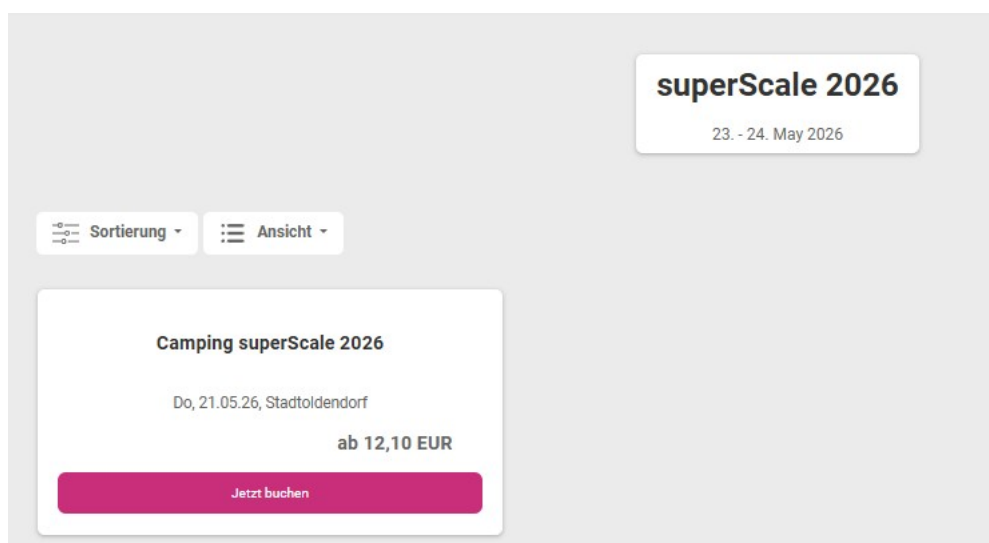

If you are booking on behalf of a group, think about how many pitches you need to save space.

There is no limit to the number of pitches per order.

So think socially and allow as many people as possible to use the campsite!

Example booking for camping

After opening the ticket shop, there is a separate item group called Camping superScale 2026:

Just to remind you:

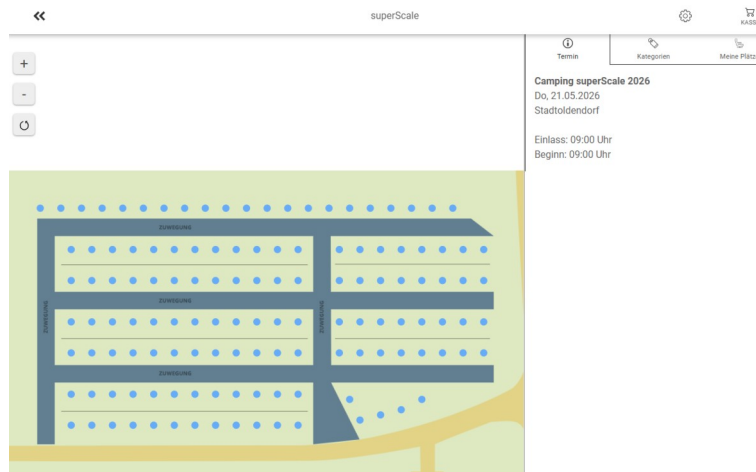

One pitch is large enough for a caravan/car or motorhome.

Two cars and two tents can also fit on one pitch, so you can save space when booking. All pitches are equipped with their own power connection.

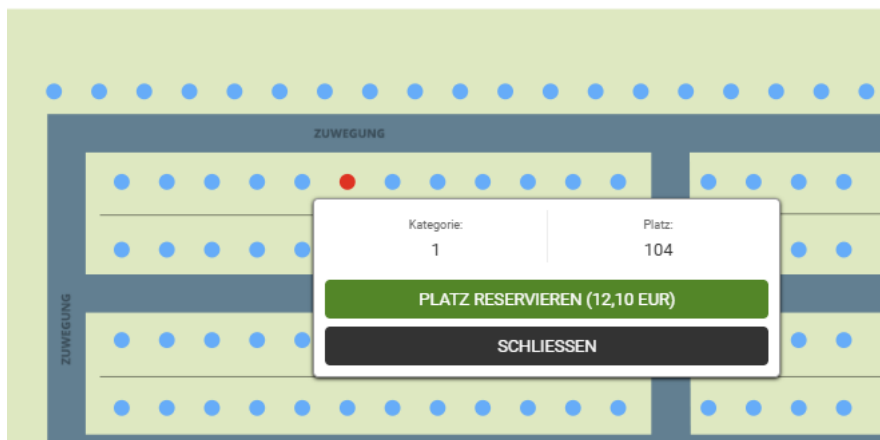

Additional information Ticket prices and camping 2026

Clicking on “Book now” will redirect you to the parking space overview:

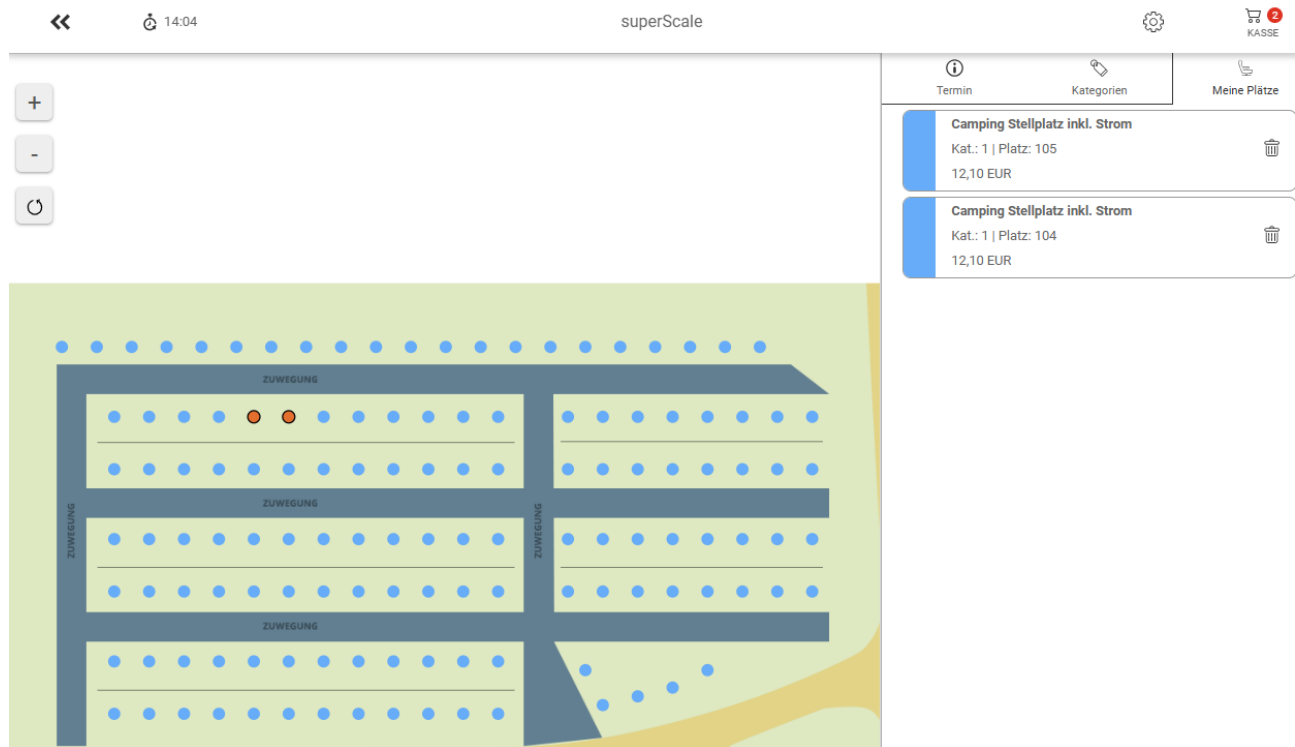

By clicking on the individual parking spaces (blue dots), these are reserved once the selection has been confirmed by clicking on the green “Reserve space” button:

The reserved seats are then marked in orange and listed on the right. Clicking on the trash can releases the respective seat, making it available again in the shop for other visitors.

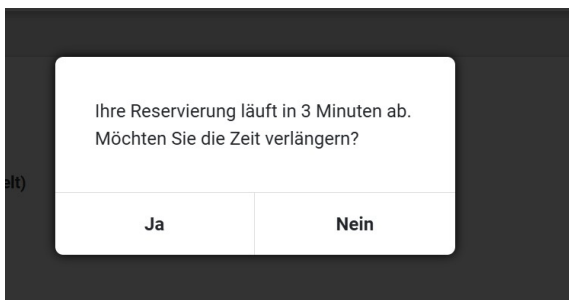

Incorrectly or accidentally reserved parking spaces must be removed in this step! So be sure to check before clicking on the shopping cart “Checkout” to proceed to the next order step!

Additional information Ticket prices and camping 2026

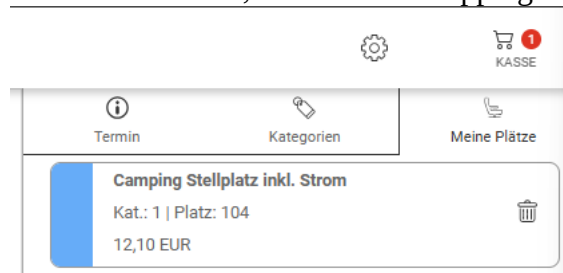

The default time limit for placing an order is 15 minutes – the remaining time is displayed in the top left corner of the screen.

If this is too short, it can be extended repeatedly. The following message will appear automatically and must be answered:

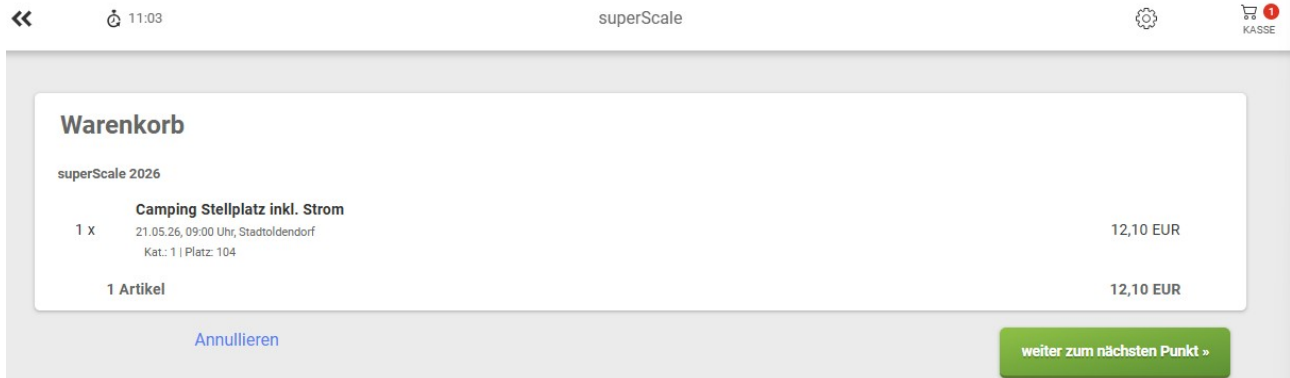

And the 15 minutes start again.

Once all the required seats have been reserved, click on the shopping cart “Checkout” to continue:

Additional information Ticket prices and camping 2026

The selected parking spaces are now displayed separately by ticket type with their total base prices: the advance booking fee and flat-rate electricity charge → EUR 2.10 plus EUR 10 = EUR 12.10.

By clicking on “Continue to the next step,” you can now enter the number of nights per person per reserved parking space!

Each reserved parking space automatically starts with one person for one night!

Up to 4 paying persons can be entered per parking space.

Up to 4 nights per person can be selected.

For example, arrival Thursday – departure Monday = 4 nights.

The occupancy details must be entered separately for each reserved parking space.

By clicking on the buttons,

(+) Anzahl Nächte Camping Erwachsener 15 EUR/ Nacht

(+) Anzahl Nächte Camping Kind (5-15 Jahre) 5 EUR/ Nacht

The relevant persons are added to the parking space in order to enter the occupancy with persons/overnight stays.

If you have made a typing error, you can delete the entry at any time by clicking on the cross or change it by entering a new number of overnight stays.

The entries for the respective parking space are completed by clicking on “Continue to the next step.”

In the window that now appears, enter your address details and complete this step by clicking on “Continue to the next step.”

Now select the payment method in the “Options” window that appears and complete this step by clicking on “Continue to the next step.”

In the final step, complete the order and make the payment.

Once again, for your information:

For legal reasons, the system will later show camping from May 21 on the tickets or in the order confirmation email. Please ignore this date!

It doesn't matter when you arrive and depart! The only thing that matters is entering the correct number of nights per person per pitch.

If you purchase several pitches in one order, there is a small special feature:

-  **The total amount of your order is 100% correct.**
-  **However, the individual parking space tickets do not show the actual individual price.** The system automatically displays **an average price** calculated from all parking spaces in the collective order. Unfortunately, it is not technically possible to change this setting.

➔ **In short:** the total amount is correct. Only the prices on the individual tickets are average values – if you need the exact individual prices, you will have to calculate them yourself.
