

## superScale 2023

### General

There is still a restriction regarding the participating vehicles at the superScale: Wraith and similar will not be admitted.

It is about the type of vehicle: Wraith, Yeti, RR - so "Racer".

These do not fit from the concept to the superScale or the scale idea, as it should be implemented at the superScale.

In this context, we also do not want to discuss whether a Wraith can be moved slowly and thus also scale.

This could also be discussed in relation to buggies, SC, monsters, rally - these are just as not allowed within the scope of superScale.

As before, there will be access restrictions for the various scale areas.

The Freescale areas are for vehicles with a total width up to 250mm and max. wheel diameter of 120mm. Of course, the popular Redrock bridge will be used there as well.

For the Scaleventure Park, vehicles up to 230mm total width and 105mm wheel diameter are allowed. Furthermore, only hardbody vehicles (i.e. no Lexan, or similar) are allowed there.

Here, those who build "scale" should be able to let off steam and measure their skills with challenging terrain. In order to be able to use here also in peace your board aids.

An appropriately themed and detailed deco will be set up here - but no model building dreamland!

Finally again the reference to a few general rules of conduct on site, so that all can prepare themselves already now:

The charging of Li batteries has to be done in appropriate "Safety Bags" and only in the area of the paddock.

Flying drones (or other remote-controlled flying objects) for the purpose of taking pictures or videos is strictly prohibited!

This applies to the entire area of the Mammut Freizeitpark.

Controlling video cameras (installed in the vehicles) via WiFi connections, e.g. via smartphones, should again be avoided, or not be done via 2.4GHz.

Turning off transmitters and vehicles when not in use.

Why all this: for safety reasons and to avoid damage due to radio interference, etc.

### Event area

Camping & Offroad Leisure Park Mammut

Leisure park Mammut in Stadtoldendorf

37627 Stadtoldendorf

### Parking facilities/ Arrival

We will use the entrance of the leisure park at Linnenkämperstraße on the event weekend - the arrival of superScale participants and visitors will be exclusively via this superScale entrance.

Visitors of the leisure park will take another exit at Linnenkämperstraße this weekend.

## superScale 2023

Those who are staying directly in the camping area of the leisure park, please approach it via this entrance as well!

There will be appropriate signposts from Linnenkämperstraße.

The parking lot for superScale participants and visitors will be located directly to the left in front of the superScale entrance (approx. 1-3 ha of meadow, depending on demand).

In general, parking is not allowed outside the camping areas and the parking area.

Parking is absolutely prohibited in the entrance and exit to the site.

In the parking area there will be reserved special areas for participants/ visitors with (walking) disabilities.

### **Paddock**

Pavilions (max. 3x3m) can be set up again without charge in the paddock area.

Reservations for stands are not possible - we ask to note this.

The paddock will be opened for participants on Friday at 3pm.

There will be a loading and unloading zone in the parking area to unload pavilions, etc. and reload them on departure.

### **Opening hours 2023**

#### **Friday, May 26, 2023**

Paddock open from 3pm.

All other areas are closed.

#### **Saturday, May 27, 2023: 9 a.m. - 8 p.m.**

All areas open, lunch break from 12:30 p.m. to 1:30 p.m. (all areas closed, track maintenance).

Competition times (driving windows) Scale Challenge are:

10:00 a.m. - 12:00 p.m. and 2:00 p.m. - 4:00 p.m., awards ceremony 5:00 p.m.

*Outside of the above competition times, these areas may not be driven on.*

The Show&Shine competition will take place from 12 to 14 o'clock in the freescale area (closed off open area).

The award ceremony will take place together with the Challenge award ceremony at 5 pm.

*Outside the mentioned competition time, the special area may not be ridden on.*

#### **Sunday, May 28, 2023: 9 a.m. - 7 p.m.**

All areas open, lunch break from 12:30 to 13:30 (all areas closed, track maintenance).

### **Special area for construction machinery / trucks suitable for construction sites**

For interested superScale participants with construction machinery and trucks suitable for construction sites (tipper function, etc.) in scale 1:16 to 1:12, we have reserved a specially reserved area in the over 3000m<sup>2</sup> Freescale area.

The reserved "construction machinery area" itself always remains closed to all other vehicles!

Whether plastic or full metal - whether electric or additionally hydraulically operated - that is open -

## superScale 2023

only the model scale must fit.

### **Scale Challenge Competition**

A "Challenge" with 260 mm gate width will be held.  
Use of aids, such as winch or sand plates, etc. are not allowed.

The participation requirements of the vehicles for the Challenge, see separate PDF file (no change to 2022).

Challenge tickets will be offered - as in 2022 - only in a limited number per driving window via the ticket store.

The tickets and their number will only be activated in the store at a later date - i.e. not yet at the start of advance sales on March 4, 2023.

The consecutive ticket numbers are also the starting numbers.  
Participants can find out their individual start time on Saturday (ticket number / driving window) from Friday 26 May onwards on site at the Orga/Info tent.

Each Challenge participant must be at the competition pavilion at least 5 minutes before the start for the briefing.

Otherwise the starting place can be given to the following participant to ensure a smooth course of the competition.

Each rider can start only once.

Multiple participation in the same competition is possible for vehicles but not for drivers, i.e. the individual participant.

Or in other words: It is the participants who register, not the vehicles.

Only exception: accepted, technical defect.

If someone drops out because of technical defect, it is possible to participate again under the following conditions:

- The technical defect has been detected by an official helper of the superScale.
- At the next upcoming driving window a new start is possible, if no other participant is "taken away" a starting place.

There will be a maximum allowed drive-through time.

This will be calculated in a way that the trail can still be passed in "scale" speed - speeding is not allowed ;)

This will ensure that the last vehicle can also pass the finish within the driving window.

### **Show & Shine Competition**

The participation requirements of the vehicles for the Show&Shine competition, see separate PDF file.

The superScale team reserves the right to exclude vehicles that do not meet the defined requirements from participation on the day of the event.

Vehicles will be entered for a separately judged car or truck class.

One booking per vehicle is required.

Tickets can be booked at the start of presale on March 4, 2023.

## superScale 2023

The consecutive ticket numbers are also the starting numbers.

Tickets will be issued for a short vehicle description.

This can be filled out by the Show&Shine participants and placed with the vehicle as information (e.g. self-build, functions, construction period, prototype, special features) for the audience.

The vehicles can be driven on Saturday starting from 12 o'clock into the open area closed off in the Freescale area and must be presented there then until 14 o'clock.

The superScale participants can vote for their favorite vehicles during this period.

For this purpose, all superScale participants will be given scoring chips at the cash desk on site in addition to the participant wristbands - one each in the different color for cars and trucks.

These chips can then be inserted until 2 p.m. into the "voting bins" (with the corresponding ticket number) set up at each vehicle.

The award ceremony for each class will then take place together with the award ceremony for the superScale Challenge at 5 pm.
